

PROMPT 1: Professional Profile

Professional Profile

Current Role

- B.Tech Computer Science Student at IMS Engineering College, Ghaziabad
- Frontend Developer Intern at CodeAlpha (May 2026 – Present)

Years of Experience

- Frontend Development Internship Experience
- Android Development Virtual Internship Experience
- Multiple hands-on academic and personal software development projects

Key Skills & Technologies

Programming Languages

- Java
- Python
- C
- JavaScript

Frontend

- React.js
- HTML5
- CSS3

Database

- MySQL
- PostgreSQL
- SQL

Tools

- Git
- GitHub

- Google AI Studio

Core Computer Science

- Object-Oriented Programming
- Responsive Web Development
- Frontend Development
- Android Development Fundamentals

Industry / Domain Expertise

- Software Development
- Frontend Web Development
- Full Stack Development (Learning)
- Android Application Development
- Web Application Development

Current Company Type

- Startup (CodeAlpha Internship)
- AICTE Virtual Internship (Eduskills)

Current Location

Ghaziabad, Uttar Pradesh, India

Notable Achievements

- Frontend Developer Intern at CodeAlpha
- Android Developer Virtual Intern under AICTE Eduskills
- Built a Personal Portfolio Website
- Developed an Image Gallery Web Application
- Created "Mystic Pathways" Tourism Website
- Strong academic performance in B.Tech Computer Science
- Continuously improving skills through hands-on projects and self-learning

Career Objective

Aspiring Software Engineer seeking Software Development Internship or Entry-Level Software Engineer opportunities where I can contribute to building scalable applications while continuously learning modern software engineering practices.

PROMPT 2: Job Search Criteria

Job Search Criteria

Target Job Titles

- Software Development Intern
- Software Engineer Intern
- Frontend Developer Intern
- React.js Developer Intern
- Full Stack Developer Intern
- Web Developer Intern
- Java Developer Intern
- Python Developer Intern
- Graduate Software Engineer
- Associate Software Engineer
- Software Engineer (Entry Level)

Preferred Company Types

- Product-Based Companies
- SaaS Companies
- Technology Startups
- MNCs
- IT Service Companies
- FinTech Companies
- AI/ML Companies

Preferred Work Mode

Priority:

1. Remote
2. Hybrid
3. Onsite

Preferred Locations

- Bengaluru
- Hyderabad
- Pune
- Noida
- Gurugram
- Delhi NCR
- Ghaziabad
- Remote (Anywhere in India)

Salary Expectations

Internships

- ₹20,000–₹60,000 per month

Entry-Level Software Engineer

- ₹4 LPA–₹8 LPA

Stretch Goal

- ₹8–12 LPA (High-growth startups or product companies)

Companies / Industries to Exclude

- Companies with poor employee reviews
- Roles unrelated to software development
- Pure technical support roles
- Sales, BPO, and non-technical positions

Job Posting Recency

Prefer jobs posted within:

- Last 7 days
- Maximum 30 days

Additional Preferences

- Internship with PPO opportunities
- Strong learning culture
- Mentorship from experienced engineers
- Modern technology stack
- Hands-on coding responsibilities
- Career growth opportunities
- Flexible work environment
- Good engineering practices
- ATS-friendly application process

PROMPT 3: Job Discovery & Analysis

Objective

Using my Professional Profile and Job Search Criteria:

- Search across available job connectors and public job sources.
- Find Software Development Internship and Entry-Level Software Engineering roles matching my skills.
- Prioritize the highest-fit opportunities.
- Exclude roles outside Software Engineering.
- Return the results in a table containing:

Company	Role	Location	Posted Date	Direct Application Link	Match Score	Why It Fits My Profile	Expected CTC
---------	------	----------	-------------	-------------------------	-------------	------------------------	--------------

Also Provide

1. Most Frequently Required Skills

Analyze all matching jobs and identify:

- Top Programming Languages
- Frameworks
- Databases
- Cloud Technologies
- Developer Tools
- Soft Skills

Rank them by frequency.

2. Skill Gap Analysis

Compare my profile against market requirements.

Include:

- Skills I already possess
 - Missing skills
 - Skills that appear most frequently in job descriptions
 - Highest ROI technologies to learn next
-

3. Market Demand Insights

Provide:

- Most in-demand Software Engineering roles
- Highest hiring cities
- Fastest-growing technologies
- Average internship stipend
- Average fresher CTC

- Product vs Service company trends
-

4. Recommendations

Suggest:

- Resume improvements
 - Portfolio improvements
 - Additional certifications
 - Projects that would improve my profile
 - GitHub improvements
 - LinkedIn optimization
 - Interview preparation roadmap
-

5. Overall Fit Assessment

Provide:

- ATS Readiness Score
- Recruiter Appeal Score
- Technical Readiness Score
- Interview Readiness Score
- Overall Market Competitiveness
